

Sir, I want to send to you these humble comments concerning the attempt of the National Ass. of Broadcasters to stifle competition from XM Radio. I think that there has to be some boundaries that would prevent large rich corporations from using the government to stop honest competition in the market place. Hasn't the government been taking Microsoft to court for this very same thing? The XM satellite radio can provide information to the public that maybe unavailable to anywhere else. XM Satellite Radio is competing in the market place just like the members of the National Ass. of Broadcasters! So I ask you to reject NAB's petition 04-160. Thank You.
